

INNOTECH

INNOVATIONS
IN THERMAL AND
ALTERNATIVE ENERGY

ENERGY

by the GREEN:EXPO creators

18–19 June 2025

WHERE BORN
INNOVATION

**THERMAL
ENERGY**

**ALTERNATIVE
ENERGY**

Kyiv, Exhibition Centre
«ACCO International»

WHAT DO WE OFFER?

18-19 June 2025
www.innotechenergy.com.ua

Kyiv, Exhibition Centre
«ACCO International»

..... PARTICIPATION IN THE EXHIBITION AREA

Registration fee: 160 €

■ EQUIPPED AREA: 100 € / sq.m.

- Carpeted area
- Power supply and lighting
- Company name on the frieze
- Furniture
(depending on the size of the stand)
- Night time security

■ UNEQUIPPED AREA: 90 € / sq.m (from 6 sq.m)

- Rent of the area
- Night time security

Additional equipment and services
are ordered separately
* price includes VAT

..... PARTICIPATION IN THE FORUM

A platform for the exchange of experience, knowledge and ideas in order to find effective solutions for the development of innovations in a particular area.

FORMAT:

- presentations
- panel discussions
- networking

..... PARTNERSHIP

Collaboration that opens up new opportunities for the development and formation of strong business relationships, contributing to the success of all stakeholders.

To make your participation in the event as effective as possible, choose the status that best suits your company's goals

THERMAL ENERGY

ALTERNATIVE ENERGY

THEMATIC AREAS OF THE EXHIBITION

THERMAL ENERGY

Energy clusters and integrated solutions: combination of heat, electricity and storage in a single system

Decentralisation of the heating system

Energy efficiency and energy assessment

Systems for thermal energy production, heat generation in buildings:

- autonomous heating systems, modular boilers, boilers fuelled by gas, electricity, wood or other fuels
- heat pumps
- solar water heaters

Biomass heat generation, bioenergy

Storage of thermal energy:

- accumulative water heaters
- thermal insulation for reduction of heat losses

Industrial innovations in heat energy

Recuperation of heat

Intelligent heat management systems:

- automated energy management and control
- smart home systems
- energy consumption monitoring

ALTERNATIVE ENERGY

Solar energy innovations:

- solar panels and solar systems
- technologies and equipment for the solar power plant construction and maintenance

Innovations for wind power generation:

- wind turbines with larger blades and generators
- use of the latest materials
- intelligent control systems to optimise blade and generator position
- modular and portable wind turbines

RES integration systems

Technologies that enable the integration of various renewable energy sources into a single energy system

Infrastructure for installation of energy generation and storage systems

- energy storage systems: mobile, hybrid, battery storage, energy storage management systems and automation
- connectivity infrastructure: cables, automatic control systems, smart meters, smart transformers
- inverters and switches

Innovations in technologies that enable more efficient management of energy resources

- smart grid intelligent grid management systems
- micro grid products and services for smart networks
- solutions for backup power management
- infrastructure for advanced metering of AMI: smart electricity meters, data centre

Hydrogen energy

for reducing carbon emissions and transition to renewable energy sources:

- electrolysis
- hydrogen accumulation
- hydrogen storage
- hydrogen fuel cells
- integration of hydrogen technologies into energy systems to ensure the stability and reliability of electricity supply

WHOM DO WE ENCOURAGE TO PARTICIPATE?

18-19 June 2025
www.innotechenergy.com.ua

Kyiv, Exhibition Centre
«ACCO International»

- Manufacturers and suppliers of equipment, technologies and solutions for thermal and alternative energy, engineering companies providing solutions for distributed generation and efficient energy usage and conservation, engineering and consulting companies, financial institutions

WHO IS OUR VISITOR?

BUSINESS COMMUNITY

owners and directors of companies:
construction sector, agricultural
sector, retail, contractors,
engineering companies, RES
electricity producers, industrial
enterprises

STATE AND COMMUNITY ENTERPRISES

condominiums, housing and
communal services, private
households, owners and residents
of cottage communities

REGULATORS, PROFESSIONAL ASSOCIATIONS,

EXPERT ENVIRONMENT,
and other key industry
stakeholders

LOCAL GOVERNMENT AUTHORITIES

mayors, heads of territorial communities,
representatives of regional state
administrations and regional authorities

FINANCIAL INSTITUTIONS,
representatives
of donor programmes,
investment funds
